

Course Title: Child Growth and Development		
Description: Child Growth and Development is the study of human development from conception through adolescence. Students identify social, physical, intellectual, and emotional developmental milestones for each age level while focusing on the responsibilities of parents, families, and caregivers to nurture the development of children. Opportunities to interact with children are provided throughout this course, which is designed to articulate with Iowa community colleges having child care programs.		
Reporting Topic	Course Level Standards	Competency Statement
Prenatal	<ul style="list-style-type: none">Analyze physical and emotional factors related to beginning the parenting process. 5.4	Students will be able to explain a healthy pregnancy.
